TRANSPORTATION

Fleet maintenance cleaning requires the removal of exhaust residue and road film from painted and metal surfaces, including the chassis, fuel tanks, rims, bumpers, landing gear, windows and mirrors. Interiors of trailers must also be safely cleaned. Lynx provides liquid and powder formulas for any need. Degreasers, cleaners and brighteners are available in various strengths.

Specific industries have unique needs. Asphalt trucks require release and dissolving agents that are both environmentally friendly and effective. Concrete trucks need acidic cleaners to cut through damaging concrete residue. Construction equipment relies on powerful cleaners to clean and prevent additional wear and tear from common work environments.

Lynx also produces effective rust inhibitors, metal conditioners and brake cleaners.

All products are biodegradable and environmentally safe for disposal. Ready-to-use or custom-blended products are effective in hard or soft water, capable of being used in brush or brush-less cleaning processes and safe for all vehicle surfaces.

“SLICK-EM HF” Asphalt Release Agent is truly a premium quality product. It utilizes Cutting Edge Technology to provide superior barrier protection to Asphalt Truck Beds. It has been specifically formulated to promote complete release even with the most difficult Super Pave Asphalt mixes. It can be foam applied to eliminate excess puddling, will not emulsify asphalt, and is completely biodegradable.

DRUM-BUSTER[®]

Innovative Cleaning Solutions

Refill Line

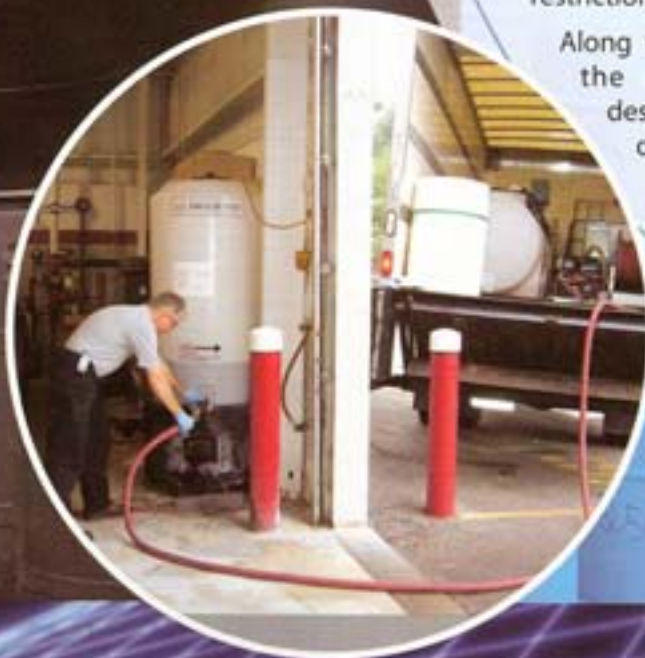

DRUM-BUSTER[®]

The most efficient way to manage your cleaners and process chemical inventory is the **Lynx Drum-Buster[®]** program. Eliminate costs associated with delivery and disposal of drums, along with the waste inherent in using drums. Using a single, refillable tank, the **Drum-Buster[®]** program maximizes both cleaning operation efficiency and safety for your employees.

Order exactly what you need. Lynx provides the free storage system to you, and your cleaning solution is pumped directly into a **Drum-Buster[®]** storage tank, using a metered delivery pump. You are billed for only what you use, which in turn, controls costs and maximizes operations. Eliminate the time spent changing barrels, hauling products and taking inventory. The **Lynx Drum-Buster[®]** program provides the safest way to handle these chemicals.

Your **Drum-Buster[®]** Tank is designed specifically for your needs. Your Lynx representative will help you design a total storage system tailored to your size, cleaning operations and environmental restrictions.

Along with specially designed formulations, the **Lynx Drum-Buster[®]** program is designed to work with our complete line of specialty equipment. Your Lynx representative can show you how the Total Lynx System will maximize efforts while controlling cleaning costs.
