## DRUM-BUSTER®

The most efficient way to manage your cleaners and process chemical inventory is the **Lynx Drum-Buster®** program. Eliminate costs associated with delivery and disposal of drums, along with the waste inherent in using drums. Using a single, refillable tank, the **Drum-Buster®** program maximizes both cleaning operation efficiency and safety for your employees.

Order exactly what you need. Lynx provides the free storage system to you, and your cleaning solution is pumped directly into a **Drum-Buster®** storage tank, using a metered delivery pump. You are billed for only what you use, which in turn, controls costs and maximizes operations. Eliminate the time spent changing barrels, hauling products and taking inventory. The **Lynx Drum-Buster®** program provides the safest way to handle these chemicals.

Your **Drum-Buster®** Tank is designed specifically for your needs. Your Lynx representative will help you design a total storage system tailored to your size, cleaning operations and environmental restrictions.

Along with specially designed formulations, the **Lynx Drum-Buster®** program is designed to work with our complete line of specialty equipment. Your Lynx representative can show you how the Total Lynx System will maximize efforts while controlling cleaning costs.
