INNOVATION

CUSTOM SOLUTIONS

Lynx offers more than 400 different liquid, powder and process chemicals to meet a multitude of applications. Each product is designed to maximize cleaning and be environmentally friendly. Our **Drum-Buster®** storage system and super concentrate program allows for various dilution options, which controls costs and manages inventory efficiently.

When special needs require a custom formulation, our experience and state-of-the-art laboratory is available to create and quickly deliver a solution to solve your industry-specific problem.

QUALITY CONTROL

Lynx manufactures and delivers a diverse line of cleaning products. With no "middle man," your Lynx representative is your partner in the design and planning of an efficient cleaning regimen.

Each batch is tested and documented to meet strict quality control standards. This ensures that your cleaning operations will always yield the same results—no surprises or need to repeat an operation.

Our state-of-the-art laboratory monitors the quality control of all Lynx products and maintains vigilance in product improvement, environmental regulation and product development.

TRANSPORTATION

Fleet maintenance cleaning requires the removal of exhaust residue and road film from painted and metal surfaces, including the chassis, fuel tanks, rims, bumpers, landing gear, windows and mirrors. Interiors of trailers must also be safely cleaned. Lynx provides liquid and powder formulas for any need. Degreasers, cleaners and brighteners are available in various strengths.

Specific industries have unique needs. Asphalt trucks require release and dissolving agents that are both environmentally friendly and effective. Concrete trucks need acidic cleaners to cut through damaging concrete residue. Construction equipment relies on powerful cleaners to clean and prevent additional wear and tear from common work environments.

Lynx also produces effective rust inhibitors, metal conditioners and brake cleaners.

All products are biodegradable and environmentally safe for disposal. Ready-to-use or custom-blended products are effective in hard or soft water, capable of being used in brush or brush-less cleaning processes and safe for all vehicle surfaces.

- Concrete truck cleaners
- Asphalt products
- Fleet maintenance
- Heavy equipment

Industrial Tank Wash Facilities Product Line Card

Product Name	Product Description	Packaging	Form	Unit of Measure
<i>Powdered Cleaners</i>

DRUM-BUSTER®

Innovative Cleaning Solutions

Refill Line —

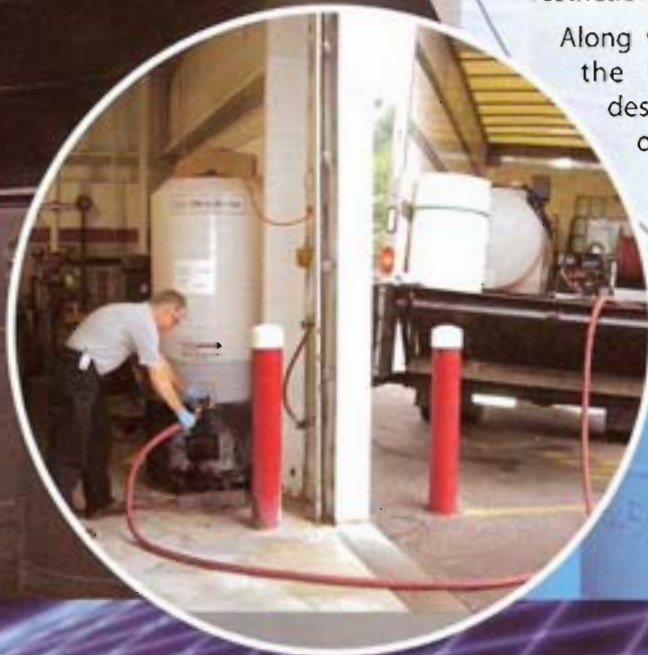

DRUM-BUSTER®

The most efficient way to manage your cleaners and process chemical inventory is the **Lynx Drum-Buster®** program. Eliminate costs associated with delivery and disposal of drums, along with the waste inherent in using drums. Using a single, refillable tank, the **Drum-Buster®** program maximizes both cleaning operation efficiency and safety for your employees.

Order exactly what you need. Lynx provides the free storage system to you, and your cleaning solution is pumped directly into a **Drum-Buster®** storage tank, using a metered delivery pump. You are billed for only what you use, which in turn, controls costs and maximizes operations. Eliminate the time spent changing barrels, hauling products and taking inventory. The **Lynx Drum-Buster®** program provides the safest way to handle these chemicals.

Your **Drum-Buster®** Tank is designed specifically for your needs. Your Lynx representative will help you design a total storage system tailored to your size, cleaning operations and environmental restrictions.

Along with specially designed formulations, the **Lynx Drum-Buster®** program is designed to work with our complete line of specialty equipment. Your Lynx representative can show you how the Total Lynx System will maximize efforts while controlling cleaning costs.

The Lynx Drum-Buster® Advantage

Lynx Enterprises and Lynx International Network are proud to introduce our Drum-Buster® Program. The Drum-Buster® Program eliminates the need for totes, drums or 5 gallon buckets. An experienced Lynx Sales Engineer will review the industrial cleaning application, recommend a specific product, provide necessary samples, and write a detailed proposal. Once the specific product has been selected, Lynx will install a tank and necessary dispensing equipment. One of our delivery trucks will then come back and safely fill your tank as needed.

UNIQUE PRODUCTS & EQUIPMENT

Lynx offers specially designed high-pressure washers, a wide assortment of absorbents, as well as stand and storage tank systems to meet your exact cleaning needs. All Lynx equipment is designed for use with our cleaning solutions and are tested for trouble-free operation and effectiveness.

PRESSURE WASHERS

Electric and gas pressure washers are available and can be portable or permanently installed, depending upon your needs. Hot and cold capabilities, along with steam units and foamers provide heavy-duty cleaning power. Equipment is available for rent or lease, as well as purchase.

TANKS AND STANDS

The Drum-Buster® Program tank and stand system eliminates waste and saves valuable employee time. Tanks are available in a variety of sizes, with quick-connection fittings, and custom-fitted stands. Tanks are installed and maintained for **FREE**.

ABSORBENT PRODUCTS

Spill response requires quick action and effective absorbent products. Lynx provides both universal and oil absorbent sheets, perforated rolls, booms and socks. These are effective on both water and land spills.

Lynx Has Equipment For All Tough Applications

Power Washer Sales / Service / Parts / Rental / Lease
Hot / Cold / Steam Units & Foamers for All Applications
Custom Detergent & Cleaning Installations

Methylene Chloride Based Paint Stripper	Stripper 292-T-PF	55 Gallon Drums

A large, artistic photograph of water splashing against a dark blue background, with many droplets and bubbles visible. The water is captured in mid-air, creating a sense of motion and freshness. The lighting highlights the texture and clarity of the water.

CUSTOM PROCESSING SOLUTIONS

WATER TREATMENT SOLUTIONS

Lynx provides premier water treatment solutions. Whether it's a boiler, cooling tower, descaling or waste water, Lynx has the industrial and environmental experience. Lynx manufactures a full line of coagulants and flocculants for any application.

ODOR CONTROL

Poultry and meat processing, food and beverage plants, manufacturing facilities, automotive and transportation facilities all have unique odor control needs. Lynx provides custom solutions to contain or counteract nearly any odor produced in manufacturing or processing. Improve the work environment while protecting community interests by eliminating unpleasant odors. Lynx's scientific approach creates the most effective deodorizers, masking agents and odor eliminators available.
